

sub's eye view

of a wasp's sting.... The effective striking power of the Westland Wasp against underwater craft is well illustrated in its search and strike role with the Royal Navy. Powered by a Bristol Siddeley 1050 s.h.p. 'Nimbus' free turbine engine the Wasp gives additional striking power to the fast new frigates of the Royal Navy and is operational day and night in practically all weathers.

In addition this frigate-based helicopter, operating over a wide radius, can also be used for rescue, reconnaissance, casualty evacuation or as a light freighter.

WESTLAND the great name in HELICOPTERS

WESTLAND AIRCRAFT LIMITED • YEOVIL • ENGLAND

Incorporating SAUNDERS-ROE DIVISION, BRISTOL HELICOPTER DIVISION and FAIREY AVIATION DIVISION.
