

# THE B·O·A·C VC10

## Now in service to Nigeria and Ghana

### Triumphantly swift, silent, serene

The BOAC VC10 now serves Lagos with nine flights a week, and Accra with one flight a week. Soon it will serve all East, Central and South Africa, Pakistan, India and the Far East. Fly by BOAC VC10 and you will find your flight the quietest, and most serene you have ever made. The thrust of this magnificent plane comes from four *rear-mounted* Rolls-Royce engines; you fly in the comfort and silence ahead of the power. Aboard the VC10, you will know how BOAC has moved a clear six years ahead of any other airline.

### Proved Rolls-Royce power from 4 Conway jets

BOAC was first with jets. Now BOAC brings you the VC10 built by the British Aircraft Corporation. Its advanced Rolls-Royce Conway engines are developed from the experience gained in 26 million hours of jet service in the air. With a thrust of 21,000 lb each, the new Conway R.Co. 42/1s are the most powerful civil jet engines in the world.

ALL OVER THE WORLD
