

# PINPOINT DELIVERY BY AIR

Superb handling qualities at highway speeds and zero altitude permit the CARIBOU to deliver 3½ ton cargoes with bullseye accuracy. The opening of the large rear door and deployment of the extraction chute are both handled by the pilot and without ground assistance vital supplies are smoothly jettisoned as the aircraft passes slowly over the drop zone.

This is an actual photograph of CV-2B CARIBOU performing a Low Level Extraction (LOLEX) drop.
