

## THE NEW SHAPE FOR LOW-LEVEL STRIKE

HAWKER SIDDELEY

# BUCCANEER

The new Hawker Siddeley Buccaneer S.Mk.2 is fitted with Rolls-Royce Spey engines for even better performance in the low-level strike/reconnaissance role. With greater range and increased thrust available for take-off, the Buccaneer consolidates its lead as the foremost operational aircraft specifically designed for this exacting task. Its proven airframe gives a service life equal to that of aircraft operating under far less arduous conditions.

Now in production with a new range of equipment, the Buccaneer S.Mk.2 will soon enter service with the Royal Navy. A land-based version, the S.Mk.50, is in production for the South African Government.

Hawker Siddeley Aviation, 32 Duke Street, St. James's, London S.W.1. The largest Aviation Group in Europe manufacturing civil airliners, civil and military transports, military strike aircraft, military trainers, business aircraft.
